

Introducing CenturyLink® Connected Backup

Get high-capacity backup with reliable Internet included.

CenturyLink gets it. Connected Backup allows you to protect your critical data with high-capacity data backup, and boost your productivity with High-Speed Internet. With CenturyLink, you can get up to 1TB of data backup, and we'll include up to 40Mbps Internet access.

One provider means one less thing to worry about. Nobody likes thinking about it, but disaster can strike at any moment. When

you trust your critical data with CenturyLink, you can rest assured that it will be safe and secure in every event. If there's a hurricane, if there's a flood, or even if you just spill coffee on your computer, you will still be able to conduct business knowing all your documents are protected and easily accessible. Our backup solution meets the requirements of most business compliance rules.

You can be more productive when you're more efficient. We can help you and your staff work efficiently and more productively.

With Connected Backup that holds up to 1TB of cloud storage, you have the capacity to back up all your business and customer data with room to spare. Moreover, our data backup is automatic, continuous and can be scheduled on your terms. Now, all the critical information on your PCs and external hard drives is easy to access and organize from virtually any device, anytime, anywhere.

Enjoy reliable backup and Internet connectivity with speeds up to 40Mbps.

CenturyLink's High-Speed Internet access is among the very best in the business. You can back up your data, even during peak business hours, without interruption. Our backup solution is supported by a 99.95% storage uptime service level agreement, so you can work with the confidence that your data is safe and available when you need it.

FREE installation and around-the-clock tech support.

Working efficiently means being able to work sooner rather than later. That's why we make sure you're up and running smoothly from day one. We offer FREE installation to get you started, and a dedicated U.S.-based technical team that you can call on at any point, 24/7/365.
