

# Core Connect® Enterprise

Optimize data, voice and cloud-based apps with one provider

Don't let your communications solution hold your business back. CenturyLink® Core Connect® Enterprise offers the perfect fit for mid-sized companies that need a fast, dedicated voice service and a data connection to the cloud, all from a single provider. In fact, CenturyLink is the first U.S. provider to bundle Microsoft® Office 365 with broadband services, giving you all your familiar Office tools that allows you to work from virtually anywhere, anytime, on any device.

## All-in-one solution gets you to the cloud

Cloud computing, multimedia apps and usage, data analytics and more, all require extensive bandwidth to function correctly. Do you have the speed you need to maximize your IT performance?

**Only half of businesses today believe that their current download or upload speeds can handle all of these bandwidth-intensive tasks.**

Source: IDC SMB Survey 2012; SMB assessment

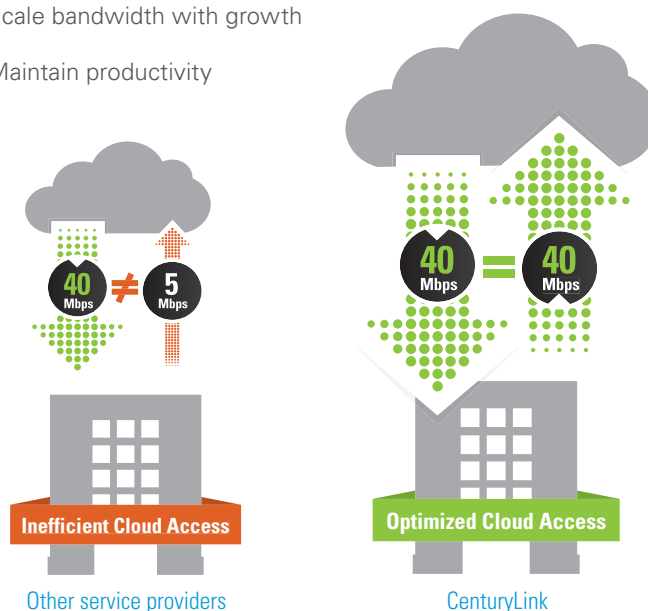

With CenturyLink Core Connect Enterprise, experience a true business-class data connection to our high-speed network. One simple bundle combines data and voice services, thus eliminating complexity and the need to manage multiple providers. Connectivity options allow you to address your networking architecture requirements, along with other options to accommodate system needs without extensive costs or migration concerns. In short, Core Connect Enterprise has the built-in flexibility to grow right along with your business. In addition, it also contains all the cloud-based applications needed to keep your company moving forward.

## Core Connect Enterprise brings you symmetrical bandwidth

Today's cloud-based apps require fast upload speeds to perform at their best. CenturyLink's symmetrical bandwidth delivers the same high speeds for downloads and uploads, so you have the capacity you need to work quickly. You can back up your data in real time, reduce strain on your network and improve employee productivity. And, you can eliminate the worry over demand spike by easily scaling your connection as your needs change.

## Benefits of optimized cloud access

- Back up data in real time
- Reduce strain on your network
- Scale bandwidth with growth
- Maintain productivity
