

Stay connected with collaboration tools, data backup and highly reliable Internet.

Connected Office is a complete package of small business cloud solutions that allows you to work from virtually anywhere, anytime. With a High-Speed Internet connection included, your important information is backed up in the cloud, so you and your employees can collaborate and access files on any Internet-enabled device. Now, it's easy to take your office on the road.

What does your business get with Connected Office?

High-Speed Internet

Our blazing-fast Internet speeds up to 45Mbps connect you to the cloud and back up files in a flash. No matter what time of the day, even during peak hours, your files will be backed up and secure without any interruptions.

Free installation and personal attention

We understand that your time is extremely important. That's why we make sure you're up and running from day one. We offer free installation, and in case of emergencies, we offer 24/7/365 help desk support.

Microsoft® Office 365

All your familiar Office tools are accessible from virtually anywhere, at anytime, over the reliable CenturyLink network. Plus, with 1TB of file storage and sharing per person, you'll be able to get more done.

Automatic data backup

You can breathe easy knowing your data is safe and secure. Get up to 250GB of data backup and storage, scheduled on your terms. That means that in the case of an emergency, like a fire or a flood, or a minor accident like spilling coffee on your computer, your business can still run at peak performance. That's because your documents will be well protected and easily accessible.
