

You know that call you don't want to miss?

Now you won't.

CenturyLink® Hosted VoIP is a complete small business voice solution that includes IP handsets and advanced calling features that keep you in touch with customers and colleagues wherever you might be. Your calls are routed via the Internet, and we make sure that every one of them is crystal clear.

As if that is not enough, other benefits include:

- Our Hosted VoIP solution provides an easy, plug and play installation for future expansion
- Save costs with plans offering just one flat rate per seat, per month

What can Hosted VoIP do for your business?

Greater Mobility.

Our advanced IP phones provide you with all the features you need to keep in touch—whenever and virtually wherever you're working. If someone calls your office phone, your calls can automatically be routed to your home or mobile device. You can even receive your voicemails as an email attachment. That means you don't have to be concerned about missing a call again.

Greater Flexibility.

Our VoIP solution is perfect for any size business, even if you just need one seat to start. With IP phones, you can easily add new ones, move them around the office or relocate them to new offices. It's plug and play made simple. You even get an easy-to-use Web portal to turn on features and make adjustments on the fly.

Greater Cost Efficiency.

Our VoIP solution is more cost-effective than a traditional landline. With each seat, we offer just one flat rate per seat, per month, and we include your new IP phones and maintenance. So those headaches and costs associated with moving offices, setting up new locations and ramping up or down will be a thing of the past.

Greater Hassle-Free Days.

We make sure you're up and running quickly. We provide setup and the things you need to get started, including detailed instruction manuals and pre-programmed IP phones. And in case of emergencies, we provide a 24/7/365 U.S.-based technical team of experts. Better yet, you're working with your trusted service provider: **CenturyLink.**

CenturyLink®
Business

CenturyLink® Hosted VoIP delivers mobility, so you can step away from the office and remain connected.

Let's say you're expecting an important call, but you step away from your office for an important meeting. Or maybe you have to work from **home** for the day. No problem. You can still receive that call.

Your smart IP phone allows that important call to find you. Your calls can be automatically routed from your **office** desk phone...

...to another device like your mobile or home phone, so you're always within reach of clients, vendors or colleagues **wherever** you are. You control when and how the call is routed.

If you can't answer when that important call comes through, you'll receive their voicemail as an email attachment.

That means you'll get their message right away and be able to save it for reference when needed later. You'll also get information on the caller and the exact time they called.

As you can see, with a VoIP phone system from CenturyLink, you'll never feel disconnected from your business, whether you're in the office, at home or on the road.
